Tetriss Pharma launches Ogluo® in Germany

A new treatment option for severe hypoglycaemia for children and adults living with diabetes

Represents Tetriss Pharma's first launch in European Union

1 November 2022 - Tetriss Pharma Ltd ("Tetriss Pharma" or "the Company"), a subsidiary of biopharmaceutical company, Arecor Therapeutics plc (AIM: AREC), today announces the launch of Ogluo® (glucagon prefilled autoinjector pen) in Germany as a treatment for severe hypoglycaemia in children and adults living with diabetes.

Ogluo® is a ready-to-use, ambiently stored, preparation of glucagon that has been specifically designed for patients living with diabetes with severe hypoglycaemia. There are an estimated 6.2 million adults living with diabetes in Germany (IDF Atlas 10th Edition).

Ogluo® pricing has today been published in the LAUER-TAXE®, the reference for all German pharmacies, insurers, and wholesalers. Full prescribing information can be found [here](#). Today's launch in Germany builds on the roll-out of Ogluo® in Great Britain. As part of the pan-European commercialisation programme, Tetriss Pharma intends to commercialise Ogluo® in core European markets. The Company is currently in discussions with various health authorities across Europe to ensure timely launches in other major European countries.

Prof. Barbara Ludwig, Universitätsklinikum Carl Gustav Carus, Dresden, commented:

"The risk of severe hypoglycaemia can be frightening for people living with diabetes, as well as for family, friends and carers. With Ogluo® being made available in Germany, it gives people living with diabetes another ready-to-use option."

Dr Shafiq Choudhary, Managing Director of Tetriss Pharma, commented:

"With the launch of Ogluo® in Germany, Tetriss Pharma has achieved a significant milestone through the commercialisation of our flagship product. A severe hypoglycaemic event can be very frightening, not only for the patients, but for those around them who have to act quickly. The launch of Ogluo® means that patients living with diabetes in Germany who may experience severe hypoglycaemia will now have a new

option to tackle those events. We look forward to expanding our reach within Europe over the coming months to bring this new treatment to people living with diabetes.”
